

Hipswell Church of England Primary School

Science

Curriculum intent.

Our curriculum provides the foundations for understanding the world. Pupils are taught essential aspects of the knowledge, methods, processes, skills and uses of science. We aim to develop a sense a sense of excitement and curiosity in all pupils about natural phenomena, the world around them and the part science has to play in it.

We develop in pupils an understanding that science is the study and exploration of the world around them using observations and experiments to ask and answer questions in order to gain knowledge about how and why things happen the way they do.

Science Understanding of the world educational programme (taken from the EYFS Framework 2020)

"Understanding the world involves guiding children to make sense of their physical world and their community. The frequency and range of children's personal experiences increases their knowledge and sense of the world around them - from visiting parks, libraries and museums to meeting important members of society such as police officers, nurses and firefighters. In addition, listening to a broad selection of stories, nonfiction, rhymes and poems will foster their understanding of our culturally, socially, technologically and ecologically diverse world. As well as building important knowledge, this extends their familiarity with words that support understanding across domains. Enriching and widening children's vocabulary will support later reading comprehension."

Year group	Topic	Understanding the World ELG The Natural World	Coverage (knowledge and skills)	Sequencing and progression
EYFS		Explore the natural world around them, making observations and drawing pictures of animals and plants.	Our World (homes) Our bodies and how they work. Autumn walk in the local environment. Talk about Autumn	
		• Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and	Winter time Operate simple equipment: electronic scales and machines. Talk about Winter.	Looking at the changes to the trees and the weather from September to October for the Autumn walk and then winter time.
			Special times and events. Family customs and traditions at home and around the world.	

		<p>what has been read in class.</p> <ul style="list-style-type: none"> • Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter 	<p>Making soup - children will talk about vegetables and which ones they like. We will walk to a shop to buy ingredients and follow instructions to make it. Children will talk about whether they like or dislike it.</p> <p>Freezing/melting - Children will experience ice and water and see how they change state.</p> <p>Complete a simple program. Cooking and tasting. Seasonal changes: moving into Spring.</p>	
			<p>What grows in our garden? What can we grow for food? Oliver's Vegetables Talk about Spring Exercising bodies Physical activity Healthy food Sleep Keeping clean Oral Health - The importance of looking after teeth, especially after chocolates.</p> <p>British science week - Making a boat - children will look at different materials including those that are waterproof and be given the opportunity to make a boat and test if it floats.</p>	<p>Seasonal changes-Building on what the trees, plants and weather was like in Autumn, winter and now Spring.</p>
			<p>Children's Gardening week (22nd-28th May) – Planting seeds and how to care for growing plants.</p>	<p>Seasonal changes-Building on what the trees, plants and weather was like in Autumn, winter and now Summer.</p>

			<p>Earth Day (50th anniversary – Restore our Earth) Walk in local area to clean up the area – look at some of the things that have been found and discuss the impact on the world.</p> <p>Caterpillars to butterflies – children watch the metamorphism from caterpillars to butterflies.</p> <p>Check growth of vegetables and maintain the plot. Dig up and eat the food we grow.</p> <p>Observe the changes that take place in a life cycle</p> <p>Seasonal changes: moving into Summer.</p>					
			<p>Finding out about our world, and the places that we have visited on our holidays. We will make comparisons to the place we live.</p> <p>Talk about Summer</p> <p>Changing Me</p> <p>Bodies</p> <p>Respecting my body</p> <p>Growing up</p> <p>Growth and change</p>	<p>Building on the wider world from the local area and children's real life experiences.</p> <p>Looking at the local area and comparing it to a coastal area.</p>				
Year group	Topic	National Curriculum objectives	Coverage (knowledge and skills)	Sequencing and progression	Working Scientifically			
					Observing	Investigating	Classifying	Recording

1	<p>Plants</p> <p>Significant scientists Carl Linnaeus (1707-1778)</p>	<p>to identify and name a variety of common wild and garden plants, including deciduous and evergreen trees</p> <p>to identify and describe the basic structure of a variety of common flowering plants, including trees</p> <p>Seasonal changes to observe changes across the 4 seasons</p> <p>to observe and describe weather associated with the seasons and how day length varies</p>	<p>Name and describe the petals, stem, leaf, bulb, flower, seed and root of a plant.</p> <p>Name a range of common plants and trees.</p> <p>Recognise deciduous and evergreen trees.</p> <p>Name the trunk, branches and root of a tree.</p> <p>Name the four seasons in order.</p> <p>Observe and describe weather associated with the seasons.</p> <p>Observe and describe how day length varies.</p>	<p>Build on observations made in EYFS of local area, plants and trees.</p> <p>Link back to growing plants and vegetables, how they needed to be looked after and where our food comes from. Build on understanding by studying a wider variety of plants and grouping.</p> <p>Refer back to seasonal walks made in EYFS. Build on understanding of when and</p>	<p>During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:</p> <p>asking simple questions and recognising that they can be answered in different ways</p> <p>observing closely, using simple equipment</p> <p>performing simple tests</p> <p>identifying and classifying</p> <p>using their observations and ideas to suggest answers to questions</p> <p>gathering and recording data to help in answering questions</p> <p>Observing Talk about what they see, touch, smell, hear or taste. Use simple equipment to help them make observations. Investigate by watching, listening, tasting, smelling and touching. Identify patterns.</p>
---	---	---	---	---	--

			<p>Observe features in the environment and explain that these are related to a specific season.</p> <p>Observe and talk about changes in the weather.</p>	<p>why some changes occur.</p> <p>Continue to make more detailed observations throughout the year.</p>	<p>Investigating</p> <p>Perform a simple test.</p> <p>Tell other people about what they have done.</p> <p>Give a simple reason for their answers</p> <p>Research to answer questions</p> <p>Identifying, classifying and grouping</p> <p>Identify and classify things they observe.</p> <p>Ask and answer simple scientific questions, giving reasons.</p> <p>Explain what they have found out.</p> <p>Talk about similarities and differences and explain what they have found out using scientific vocabulary.</p>
1	<p>Animals, including humans.</p> <p>Significant scientists</p> <p>Jane Goodall (present day)</p>	<p>to identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals</p> <p>to identify and name a variety of common animals that are carnivores, herbivores and omnivores</p> <p>describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets)</p> <p>to identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense</p>	<p>Sort photographs of living and non-living things.</p> <p>Point out some of the differences between different animals.</p> <p>Identify and name a variety of common animals (birds, fish, amphibians, reptiles, mammals, invertebrates).</p> <p>Identify and name a variety of common animals that are carnivores, herbivores and omnivores.</p> <p>Classify animals by what they eat.</p> <p>Name, draw and label basic parts of the human body.</p> <p>Identify the main parts of the human body and link them to their sense.</p> <p>Name the parts of an animal's body and compare the bodies of different animals.</p> <p>Name a range of domestic animals.</p>	<p>Link to observations and talk about pets at home in EYFS.</p> <p>Study similarities and differences in animals at home, care and needs of animals, compare with wild animals.</p> <p>Build on understanding of how our bodies work and how to take care of them.</p>	<p>Recording findings</p> <p>Show their work using pictures, labels and captions.</p> <p>Record their findings using standard units.</p> <p>Record some information in a chart or table.</p> <p>Use ICT to show their working.</p> <p>Measure using simple equipment.</p>

		<p>Seasonal changes to observe changes across the 4 seasons to observe and describe weather associated with the seasons and how day length varies</p>	<p>Name some parts of the human body that cannot be seen. Say why certain animals have certain characteristics.</p> <p>Name the four seasons in order. Observe and describe weather associated with the seasons. Observe and describe how day length varies. Observe features in the environment and explain that these are related to a specific season. Observe and talk about changes in the weather.</p>	<p>Refer back to seasonal walks made in EYFS. Build on understanding of when and why some changes occur. Continue to make more detailed observations throughout the year.</p>	
1	Everyday Materials	<p>to distinguish between an object and the material from which it is made to identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock to describe the simple physical properties of a variety of everyday materials to compare and group together a variety of everyday materials on the</p>	<p>Describe materials using their senses. Explain what material objects are made from. Explain why a material might be useful for a specific job. Name some different everyday materials e.g. wood, plastic, metal, water and rock. Sort materials into groups by a given criteria. Explain how solid shapes can be changed by squashing, bending, twisting and stretching.</p>	<p>Link to baking, building and creative activities in EYFS. Build on understanding of materials that are appropriate for different tasks and how materials change when mixed/cooked.</p>	

		<p>basis of their simple physical properties</p> <p>Seasonal changes to observe changes across the 4 seasons to observe and describe weather associated with the seasons and how day length varies</p>	<p>Describe things that are similar and different between materials. Explain what happens to certain materials when they are heated, e.g. bread, ice, chocolate.</p> <p>Name the four seasons in order. Observe and describe weather associated with the seasons. Observe and describe how day length varies. Observe features in the environment and explain that these are related to a specific season. Observe and talk about changes in the weather.</p>	<p>Refer back to seasonal walks made in EYFS. Build on understanding of when and why some changes occur. Continue to make more detailed observations throughout the year.</p>

Year group	Topic	National Curriculum objectives	Coverage (knowledge and skills)	Sequencing and progression	Working Scientifically			
					Observing	Investigating	Classifying	Recording
2	<p>Uses of Everyday Materials:</p> <p>Andre Konstantin Geim (present day)</p>	<p><i>Floating and sinking. Choosing materials for particular purposes.</i></p> <p>to identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses to find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching</p>	<p>Describe the simple physical properties of a variety of everyday materials.</p> <p>Compare and group together a variety of materials based on their simple physical properties.</p> <p>Describe the properties of different materials using words like, transparent or opaque, flexible, etc.</p> <p>Sort materials into groups and say why they have sorted them in that way.</p> <p>Explore how the shapes of solid objects can be changed (squashing, bending, twisting, stretching).</p> <p>Find out about people who developed useful new materials (John Dunlop, Charles Macintosh, John McAdam).</p> <p>Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic,</p>	<p>Link to work from Year 1, naming and sorting different materials, and extend to find similarities and differences between materials and identifying properties.</p>	<p>During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:</p> <p>asking simple questions and recognising that they can be answered in different ways</p> <p>observing closely, using simple equipment</p> <p>performing simple tests</p> <p>identifying and classifying</p> <p>using their observations and ideas to suggest answers to questions</p> <p>gathering and recording data to help in answering questions</p>	<p>Observing</p> <p>Use senses to help them answer questions.</p> <p>Use some scientific words to describe what they have seen and measured.</p> <p>Compare several things.</p> <p>Suggest ways of finding out through listening, hearing, smelling, touching and tasting.</p>	<p>Investigating</p> <p>Research to answer questions - use information from books and online information to find things out.</p> <p>Carry out a simple fair test.</p> <p>Explain why it might not be fair to compare two things.</p> <p>Say whether things happened as they expected. Suggest how to find things out.</p> <p>Use prompts to find things out.</p>	

			<p>glass, brick, rock, paper, cardboard for particular uses.</p> <p>Explain how materials are changed by heating and cooling.</p>		<p>Identifying, classifying and grouping Organise things into groups. Find simple patterns (or associations). Identify animals and plants by a specific criteria, eg, lay eggs; have feathers. Suggest more than one way of grouping animals and plants and explain their reasons.</p> <p>Recording findings Use text, diagrams, pictures, charts, tables to record their observations. Measure accurately using simple equipment.</p>
2	<p>Animals, including humans</p> <p>Louis Pasteur (1822 -1895)</p> <p>Living things and their habitats</p>	<p>to notice that animals, including humans, have offspring which grow into adults</p> <p>to find out about and describe the basic needs of animals, including humans, for survival (water, food and air)</p> <p>to describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene</p> <p>to explore and compare the differences between things that are living, dead, and things</p>	<p>Describe what animals need to survive.</p> <p>Explain that animals grow and reproduce.</p> <p>Describe the life cycle of some living things (e.g. egg, chick, chicken).</p> <p>Explain the basic needs of animals, including humans for survival (water, food, air)</p> <p>Describe why exercise, balanced diet and hygiene are important for humans.</p> <p>Explain that animals reproduce in different ways.</p> <p>Match certain living things to the habitats they are found in.</p>	<p>Link to work completed in Year 1, naming different animals and grouping according to characteristics develop further by finding out about their offspring.</p> <p>Build on understanding of the body, senses and how the body works by learning about how to keep ourselves healthy and what we need to grow and develop.</p> <p>Link to observations made in EYFS and Year 1 about how plants and animals are affected by the seasons.</p>	

		<p>that have never been alive</p> <p>to identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other</p> <p>to identify and name a variety of plants and animals in their habitats, including microhabitats</p> <p>to describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food</p>	<p>Explain the differences between living and non-living things.</p> <p>Describe some of the life processes common to plants and animals, including humans.</p> <p>Decide whether something is living, dead or non-living.</p> <p>Describe how a habitat provides for the basic needs of things living there.</p> <p>Describe a range of different habitats.</p> <p>Describe how plants and animals are suited to their habitat.</p> <p>Create a simple food chain.</p> <p>Name some characteristics of an animal that help it to live in a particular habitat.</p> <p>Describe what animals need to survive and link this to their habitats.</p>	<p>Build on knowledge and explore how animals are adapted to their habitat</p> <p>Link to seasonal changes observations and how this affects animals and plants and consider how they might adapt.</p>	
2	<p>Plants</p> <p>George Washington Carver(1864-1943)</p>	<p>to observe and describe how seeds and bulbs grow into mature plants</p> <p>to find out and describe how plants need water, light and a suitable temperature to grow and stay healthy</p>	<p>Describe what plants need to survive.</p> <p>Observe and describe how seeds and bulbs grow into mature plants.</p> <p>Find out and describe how plants need water, light and a suitable</p>	<p>Build on observations and work from EYFS and Year 1 to develop understanding of the different parts of a plant, observe how they develop and consider how they help the plant to grow.</p>	

			temperature to grow and stay healthy		
--	--	--	--------------------------------------	--	--

Year group	Topic	National Curriculum objectives	Coverage (knowledge and skills)	Sequencing and progression	Working Scientifically		
					Planning	Evidence	Conclusion
3	Plants Agnes Arber (1879-1960)	<p>to identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers</p> <p>to explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant</p> <p>to investigate the way in which water is transported within plants</p> <p>to explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal</p> <p style="text-align: center;">Light</p> <p>to recognise that they need light in order to see things</p>	<p>Identify and describe the functions of the different parts of flowering plants (roots, stem/trunk, leaves and flowers).</p> <p>Explore the requirement of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and explain how they vary from plant to plant.</p> <p>Investigate the way in which water is transported within plants.</p> <p>Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.</p> <p>Classify a range of common plants according to many criteria (environment found, size, climate required, etc).</p> <p>Recognise that light is needed so we can see things.</p>	<p>Build on observations and investigations in KS1 and explore how different plants have different needs to develop and grow. Further develop how the parts of the plant are important and how they are all needed to ensure healthy growth.</p> <p>Build on observations of insects and animals using plants and flowers from EYFS and KS1 and develop understanding of how plants and animals need each other.</p>	<p>During years 3 and 4, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:</p> <p>asking relevant questions and using different types of scientific enquiries to answer them</p> <p>setting up simple practical enquiries, comparative and fair tests</p> <p>making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers</p> <p>gathering, recording, classifying and presenting data in a variety of ways to help in answering questions</p> <p>recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables</p> <p>reporting on findings from enquiries and research, including oral and written explanations, displays or presentations of results and conclusions</p>		

		<p>and that dark is the absence of light to notice that light is reflected from surfaces to recognise that light from the sun can be dangerous and that there are ways to protect their eyes to recognise that shadows are formed when the light from a light source is blocked by an opaque object to find patterns in the way that the size of shadows change</p>	<p>Recognise that dark is the absence of light. Explore how light reflects off different surfaces. Discuss how light travels. Discuss why it is important to protect their eyes from bright lights. Look for, and measure, shadows; find out how they are formed and what might cause the shadows to change. Explain the difference between transparent, translucent and opaque. Explain why their shadow changes when the light source is moved closer or further from the object.</p>		<p>using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions identifying differences, similarities or changes related to simple scientific ideas and processes using straightforward scientific evidence to answer questions or to support their findings.</p> <p style="text-align: center;">Planning</p> <p>Use different ideas and suggest how to find something out. Make and record a prediction before testing. Plan a fair test and explain why it was fair. Set up a simple fair test to make comparisons. Explain why they need to collect information to answer a question.</p>
	<p>Animals including humans</p> <p>Significant scientists</p> <p>Rosalind Franklin (1920-1958)</p>	<p>identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat identify that humans and some other animals have skeletons and muscles for support, protection and movement</p>	<p>Explain the importance of a nutritionally balanced diet. Describe how nutrients, water and oxygen are transported within animals and humans and identify that animals, including humans, cannot make their own food: they get nutrition from what they eat. Describe and explain the skeletal system and muscular system of a human and explain their purpose. Identify that other animals have skeletal and muscular systems. Explain how the muscular and skeletal systems work together to create movement.</p>	<p>Further develop knowledge from KS1 work on Animals including Humans to explore what a healthy, balanced diet should include.</p>	<p style="text-align: center;">Obtaining and presenting evidence</p> <p>Measure using different equipment and units of measure. Observe over time when required. Record their observations in different ways, labelled diagrams, charts etc. Describe what they have found using scientific language. Look for patterns and explain their findings. Identify, order and classify. Research to answer questions and obtain information. Make accurate measurements using standard units.</p> <p style="text-align: center;">Conclusion and evaluation</p>

	<p>Forces and Magnets</p>	<p>to compare how things move on different surfaces to notice that some forces need contact between 2 objects, but magnetic forces can act at a distance to observe how magnets attract or repel each other and attract some materials and not others to compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials to describe magnets as having 2 poles to predict whether 2 magnets will attract or repel each other, depending on which poles are facing</p>	<p>Observe that magnetic forces can act without direct contact, unlike most forces, where direct contact is necessary. Explore the behaviour and everyday uses of different magnets (for example, bar, ring, button and horseshoe). Compare how different things move and group them; raise questions and carry out tests to find out how far things move on different surfaces. Gather and record data to find answers to their questions. Sort materials into those that are magnetic and those that are not. Look for patterns in the way that magnets behave in relation to each other and what might affect this, for example, the strength of the magnet or which pole faces another. Identify how these properties make magnets useful in everyday items and suggest creative uses for different magnets. Investigate the strengths of different magnets and find fair ways to compare them.</p>	<p>Build on earlier work in KS1 on materials to help identify materials that are magnetic. Also develop understanding of properties of different materials and link to friction and how this can affect movement.</p> <p>Build on observations and investigations of the uses of materials for different purposes and explore how a greater variety of properties are used in everyday life.</p>	<p>Explain what they have found out and use their measurements to say whether it helps to answer their question. Use a range of equipment (including a data-logger) in a simple test. Suggest how to improve their work if they did it again.</p>
<p>3</p>	<p>Rocks</p> <p>Mary Anning (1799-1847)</p>	<p>to compare and group together different kinds of rocks on the basis of their appearance and simple physical properties</p>	<p>Explore different kinds of rocks and soils, including those in the local environment. Observe rocks, including those used in buildings and gravestones, and explore how and why they might have changed over time.</p>	<p>Link to observations in EYFS and KS1 of the local environment, building on the use of equipment to</p>	

	<p>Charles Francis Richter (1900-1985)</p>	<p>to describe in simple terms how fossils are formed when things that have lived are trapped within rock to recognise that soils are made from rocks and organic matter</p>	<p>Use a hand lens or microscope to help them to identify and classify rocks according to whether they have grains or crystals, and whether they have fossils in them. Research and discuss the different kinds of living things whose fossils are found in sedimentary rock and explore how fossils are formed. Explore different soils and identify similarities and differences between them and investigate what happens when rocks are rubbed together or what changes occur when they are in water. Raise and answer questions about the way soils are formed. Classify igneous and sedimentary rocks. Begin to relate the properties of rocks with their uses.</p>	<p>observe and record appropriately. Link to work in Y2 on materials and how properties of materials make them suitable for different purposes. Build on understanding of grouping from KS1 to develop ways in which to classify.</p>

					Planning	Evidence	Conclusion
4	<p>Sound</p> <p>Significant scientists</p> <p>Thomas Edison (1847-1931)</p> <p>Nikola Tesla (1856-1943)</p>	<p>to identify how sounds are made, associating some of them with something vibrating</p> <p>to recognise that vibrations from sounds travel through a medium to the ear</p> <p>to find patterns between the pitch of a sound and features of the object that produced it</p> <p>to find patterns between the volume of a sound and the strength of the vibrations that produced it</p> <p>to recognise that sounds get fainter as the distance from the sound source increases</p>	<p>Describe a range of sounds and explain how they are made.</p> <p>Associate some sounds with something vibrating.</p> <p>Compare sources of sound and explain how the sounds differ.</p> <p>Explain how to change a sound (louder/softer).</p> <p>Recognise how vibrations from sound travel through a medium to an ear.</p> <p>Find patterns between the pitch of a sound and features of the object that produce it; explain ways to change the pitch of a sound.</p> <p>Find patterns between the volume of the sound and the strength of the vibrations that produced it.</p> <p>Recognise that sounds get fainter as the distance from the sound source increases.</p> <p>Investigate how different materials can affect the pitch and volume of sounds.</p>	<p>Link to observations made in EYFS and KS1 topic Animals including Humans, about how we hear and what can affect our ability to hear clearly.</p> <p>Refer to experiences using different materials in KS1 and Y3 to identify how different sounds are made and to predict which would be good sound insulators.</p>	<p>During years 3 and 4, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:</p>	<p>asking relevant questions and using different types of scientific enquiries to answer them</p> <p>setting up simple practical enquiries, comparative and fair tests</p> <p>making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers</p> <p>gathering, recording, classifying and presenting data in a variety of ways to help in answering questions</p> <p>recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables</p> <p>reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions</p> <p>using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions</p> <p>identifying differences, similarities or changes related to simple scientific ideas and processes</p> <p>using straightforward scientific evidence to answer questions or to support their findings.</p>	

	<p>Electricity</p>	<p>to identify common appliances that run on electricity to construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers to identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery to recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit to recognise some common conductors and insulators, and associate metals with being good conductors</p>	<p>Work out which materials give the best insulation for sound.</p> <p>Construct simple series circuits, trying different components, for example, bulbs, buzzers and motors, and including switches, and use their circuits to create simple devices. Draw the circuit as a pictorial representation. Pupils should be taught about precautions for working safely with electricity. Observe patterns, for example, that bulbs get brighter if more cells are added, that metals tend to be conductors of electricity, and that some materials can, and some cannot, be used to connect across a gap in a circuit.</p>	<p>Build on understanding of our world from EYFS and KS1 to develop knowledge about safe uses of electricity.</p> <p>Refer to topic on magnetism in Y3 and compare conductors of electricity with materials that are magnetic.</p>	<p style="text-align: center;">Planning</p> <p>Set up a simple fair test to make comparisons. Plan a fair test and isolate variables, explaining why it was fair and which variables have been isolated. Suggest improvements and predictions. Decide which information needs to be collected and decide which is the best way for collecting it. Use their findings to draw a simple conclusion.</p> <p style="text-align: center;">Obtaining and presenting evidence</p> <p>Take measurements using different equipment and units of measure and record what they have found in a range of ways. Make accurate measurements using standard units. Explain their findings in different ways (display, presentation, writing). Observe over time when required and record observations Identify patterns in results Research to collect information and to answer questions. Identify, group and classify based on results.</p>
<p>4</p>	<p>Animals including humans</p> <p>Significant scientists</p>	<p>describe the simple functions of the basic parts of the digestive system in humans</p>	<p>Explain how certain living things depend on one another to survive. Research the main body parts associated with the digestive system: mouth, tongue, teeth,</p>	<p>Refer to topic in Y3 and build on understanding of what animals need to survive.</p> <p>Further develop knowledge from KS1 work on Animals including</p>	<p style="text-align: center;">Conclusion and evaluation</p> <p>Find any patterns in their evidence or measurements. Make a prediction based on something they have found out.</p>

	Rosalind Franklin (1920-1958)	<p>identify the different types of teeth in humans and their simple functions</p> <p>construct and interpret a variety of food chains, identifying producers, predators and prey</p>	<p>oesophagus, stomach, and small and large intestine, and explore questions that help them to understand their special functions. Identify the simple function of different types of teeth in humans. Compare the teeth of herbivores and carnivores. Explain what a simple food chain shows. Construct and interpret a variety of food chains, identifying producers, predators and prey. Classify living things and non-living things by a number of characteristics that they have thought of.</p>	<p>Humans to explore what a healthy, balanced diet should include.</p>	<p>Evaluate what they have found using scientific language, drawings, labelled diagrams, bar charts and tables. Use straightforward scientific evidence to answer questions or to support their findings. Identify differences, similarities or changes related to simple scientific ideas or processes.</p>
4	States of matter	<p>compare and group materials together, according to whether they are solids, liquids or gases observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) identify the part played by evaporation and</p>	<p>Pupils should explore a variety of everyday materials and develop simple descriptions of the states of matter (solids hold their shape; liquids form a pool not a pile; gases escape from an unsealed container). Observe water as a solid, a liquid and a gas and note the changes to</p>	<p>Build on understanding from KS1 and Y3 about the properties of materials and explore if these properties can change.</p> <p>Develop understanding of how changing properties of materials affects/is useful in everyday life, building on observations in KS1.</p>	

		<p>condensation in the water cycle and associate the rate of evaporation with temperature</p>	<p>water when it is heated or cooled. Group and classify a variety of different materials. Explore the effect of temperature on substances such as chocolate, butter, cream (for example, to make food such as chocolate crispy cakes and ice-cream for a party). Research the temperature at which materials change state, for example, when iron melts or when oxygen condenses into a liquid. Observe and record evaporation over a period of time, for example, a puddle in the playground or washing on a line, and investigate the effect of temperature on washing drying or snowmen melting. Group and classify a variety of materials according to the impact of temperature on them.</p>		
4	Living Things and their Habitats.	to recognise that living things can be grouped in a variety of ways	Pupils should use the local environment throughout the year to raise and answer	Link to observations made of seasonal changes in KS1 and how these will affect the habitat of living things.	

		<p>to explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment</p> <p>to recognise that environments can change and that this can sometimes pose dangers to living things</p>	<p>questions that help them to identify and study plants and animals in their habitat.</p> <p>Identify how the habitat changes throughout the year.</p> <p>Explore possible ways of grouping a wide selection of living things that include animals, flowering plants and non-flowering plants.</p> <p>Begin to put vertebrate animals into groups, for example: fish, amphibians, reptiles, birds, and mammals; and invertebrates into snails and slugs, worms, spiders, and insects.</p> <p>Group plants into categories such as flowering plants (including grasses) and non-flowering plants, for example ferns and mosses.</p> <p>Explore examples of human impact (both positive and negative) on environments, for example, the positive effects of nature reserves, ecologically planned parks, or garden ponds, and the negative</p>	<p>Further develop classification skills by researching a wider variety of animals and identifying similarities and differences.</p> <p>Build on understanding of habitats by finding out about a wider variety of habitats and how this affects the animals and plants that live there. Include nature reserves, man-made and natural habitats locally and further afield, including in different parts of the world.</p>	
--	--	---	---	--	--

			<p>effects of population and development, litter or deforestation.</p> <p>Use and make simple guides or keys to explore and identify local plants and animals.</p> <p>Make a guide to local living things.</p> <p>Raise and answer questions based on observations of animals and what they have found out about other animals that they have researched.</p>

5	<p>Earth and Space</p> <p>Significant scientists</p>	to describe the movement of the Earth and other planets	Explain how seasons and the associated weather is created.	Build on observations from EYFS, KS1 and LKS2 to further develop understanding	<p>During years 5 and 6, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:</p> <ul style="list-style-type: none"> planning different types of scientific enquiries to answer questions, 		

	<p>Tiera Guinn Fletcher (present day) Brian Cox (present day) Nicolaus Copernicus (1473-1543) Katherine Johnson Steven Hawking</p>	<p>relative to the sun in the solar system to describe the movement of the moon relative to the Earth to describe the sun, Earth and moon as approximately spherical bodies to use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky</p>	<p>Explore a model of the sun and Earth that enables them to explain day and night. Understand that the sun is a star at the centre of our solar system and that it has 8 planets: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune (Pluto was reclassified as a 'dwarf planet' in 2006). Understand that a moon is a celestial body that orbits a planet (Earth has 1 moon; Jupiter has 4 large moons and numerous smaller ones). Understand that it is not safe to look directly at the sun, even when wearing dark glasses. Find out about the way that ideas about the solar system have developed, understanding how the geocentric model of the solar system gave way to the heliocentric model by considering the work of scientists such as Ptolemy, Alhazen and Copernicus. Compare the time of day at different places on the Earth through internet links and direct communication.</p>	<p>of our world and its place in the solar system.</p> <p>Build on knowledge of seasonal changes and further develop this understanding of why this happens and differences around the globe.</p>	<p>including recognising and controlling variables where necessary</p> <ul style="list-style-type: none"> • taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate • recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs • using test results to make predictions to set up further comparative and fair tests • reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and a degree of trust in results, in oral and written forms such as displays and other presentations • identifying scientific evidence that has been used to support or refute ideas or arguments <p style="text-align: center;">Planning</p> <p>Plan and carry out a scientific enquiry to answer questions, including recognising and controlling variables where necessary. Make a prediction with reasons. Use test results to make predictions to set up comparative and fair tests. Identify areas to research. Present a report of their findings through writing, display and presentation.</p>
--	---	--	--	---	--

		<p>Forces to explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</p>	<p>Create simple models of the solar system. Construct simple shadow clocks and sundials, calibrated to show midday and the start and end of the school day.</p> <p>Explore falling objects and raise questions about the effects of air resistance. Explore the effects of air resistance by observing how different objects such as parachutes and sycamore seeds fall. Explore falling paper cones or cupcake cases, and design and making a variety of parachutes, carrying out fair tests to determine which designs are the most effective. Experience forces that make things begin to move, get faster or slow down. Explore the effects of friction on movement and find out how it slows or stops moving objects, for example, by observing the effects of a brake on a bicycle wheel. Explore the effects of levers, pulleys and simple machines on movement.</p>	<p>Refer to Y3 and how friction can slow movement. Build on this to develop understanding of a wider range of forces.</p>	<p>Explain, in simple terms, a scientific idea and what evidence supports it.</p> <p>Obtaining and presenting evidence Take measurements using a range of scientific equipment with increasing accuracy and precision. Take repeat readings when appropriate. Record more complex data and results using scientific diagrams, labels, classification keys, tables, scatter graphs, bar and line graphs. Research using a range of resources as appropriate. Explain why a measurement needs to be repeated.</p> <p>Conclusion and evaluation Report and present findings from enquiries through written explanations and conclusions. Use a graph to answer scientific questions. Link what they have found out to other science.</p>
--	--	---	--	---	---

			<p>Find out how scientists, for example, <i>Galileo Galilei</i> and <i>Isaac Newton</i> helped to develop the theory of gravitation.</p> <p>Explore resistance in water by making and testing boats of different shapes. Design and make products that use levers, pulleys, gears and/or springs and explore their effects.</p> <p>Describe and explain how motion is affected by forces (including gravitational attractions, magnetic attraction and friction).</p>		
	Materials	<p>to compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets know that some materials will dissolve in liquid to form a solution, and describe how to</p>	<p>Explore and compare the properties of a broad range of materials, including relating these to magnetism and electricity.</p> <p>Explore reversible changes, including evaporating, filtering, sieving, melting and dissolving, recognising that melting and dissolving are different processes.</p> <p>Explore changes that are difficult to reverse, for example, burning, rusting and other reactions, for</p>	<p>Refer to States of Matter, Y4.</p> <p>Build on understanding of how states of matter can be changed and whether these changes are reversible.</p> <p>Link work from Y3, 4 and 5 on magnetism and forces and apply understanding to a wider range of investigations.</p>	

		<p>recover a substance from a solution</p> <p>to use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</p> <p>to give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic</p> <p>to demonstrate that dissolving, mixing and changes of state are reversible changes</p> <p>explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda</p>	<p>example, vinegar with bicarbonate of soda.</p> <p>Find out about how chemists create new materials, for example, Spencer Silver, who invented the glue for sticky notes or Ruth Benerito, who invented wrinkle-free cotton.</p> <p>Use the terms 'reversible' and 'irreversible'.</p> <p>Use their knowledge of materials to suggest ways to classify (solids, liquids, gases).</p>		
5	Animals including humans	<p>to describe the changes as humans develop to old age</p> <p>to identify and name the main parts of the human circulatory</p>	<p>Draw a timeline to indicate stages in the growth and development of humans.</p> <p>Learn about the changes experienced in puberty.</p> <p>Research the gestation</p>	<p>Link to Y3 and Y4.</p> <p>Build on understanding of how animals grow, develop and reproduce</p>	

		<p>system, and describe the functions of the heart, blood vessels and blood</p> <p>to recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function</p> <p>to describe the ways in which nutrients and water are transported within animals, including humans</p>	<p>periods of other animals and compare them with humans. Find out and record the length and mass of a baby as it grows. Create a timeline to indicate stages of growth in certain animals, such as frogs and butterflies. Explore and answer questions that help them to understand how the circulatory system enables the body to function. Learn how to keep their bodies healthy and how their bodies might be damaged - including how some drugs and other substances can be harmful to the human body. Explore the work of scientists and scientific research about the relationship between diet, exercise, drugs, lifestyle and health. Explore the work of medical pioneers, for example, William Harvey and Galen and recognise how much we have learnt about our bodies. Compare the organ systems of humans to other animals.</p>	<p>to find differences and similarities.</p> <p>Build on knowledge of what is needed to keep humans healthy and further understanding of the human body and how to look after it.</p>
